Neurology Review, Research and Chiropractic Care— How Do We Help?

Presented by: Trevor Berry, DC

Key Clinical Takeaways:

- Mechanisms of neuro degeneration and disease. Introduction to brain based research.
- Neuroprotective physiology including literature review.
- Condition specific neurology review applications for:
 - Dementia
 - Alzheimer's disease
- Basal Ganglia disorders (Parkinson's disease, hyperkinetic disorders)
- Acute brain injury and inflammation (Traumatic brain injury-acute phase and chronic, stroke, autoimmune)
- Demonstrations of laser applications and summary

Neurology Review, Research and Chiropractic Care— How Do We Help? Seating is Limited Register Today!

About The Seminar

The human body is the most complex system known. The most important network, the nervous system, can be one of the most challenging to understand. Dr. Trevor Berry, a board-certified Chiropractic Neurologist and low level laser expert, will explore its many connections to other parts of the body. He will discuss the generation of, and cutting edge treatments for, many of the brain diseases that are greatly affecting our society, and that he sees daily at his Chiropractic Neurology Center: strokes, autoimmune diseases, Basal Ganglia disorders, Dementia and Alzheimer's.

Dr. Berry's expertise stems from a deep personal interest to find ways that would help him treat these conditions and improve the lives of his patients. He will take you through a patient's health history, with special attention to these conditions and his treatment recommendations. Come receive advanced training by and education from, one of the foremost experts in the world in this field.

About The Presenter

Dr. Berry was born and raised in Alberta, Canada. He completed his pre-medicine requisites at the University of Calgary and went on to complete his Doctorate at Parker University in Dallas, Texas. He graduated Magna Cum Laude, Salutatorian and was the recipient of many academic awards including the Parker Scholastic Excellence Award.

Upon completion of his Doctor of Chiropractic, Dr. Berry attended the Carrick Institute for Graduate Studies. Dr. Berry has traveled throughout North America and Europe attending neurology conferences and modules to obtain the most recent information in the field of functional neurology. He became a board certified Chiropractic Neurologist in 2001 upon passing the American Chiropractic Neurology board examination. He has over 2000 post-doctoral hours in the study of Neurology. He became interested in the field of Low Level Laser upon suffering from a severe inflammatory arthritis that almost ended his Chiropractic career. Laser therapy completely alleviated his condition so he became interested in the scientific study of how and why lasers were so effective. He went on to become lead investigator in FDA laser studies and uses lasers extensively in his neurology based practice.

Seminar Cost \$49*

CE Hours

States Applied for: AZ, NM, UT, NV, CA

If you need hours for other states, please contact NWHUSU before the seminar at 800-888-4777. Certain restrictions apply. *\$75 extra for CEs (if needed). Not all states covered. CE Hours are applied for by NWHUSU to the chiropractic state licensing boards. Transcripts are sent out quarterly. If you need your transcript sent earlier, please contact NWHUSU at 800-888-4777 x446.
